New variant of an Erwinia-type creatinase modified relative to a wild-type creatinase having creatinase activity, useful for determining creatinine and/or creatine concentration in a sample.

Example 4; Page 20-21; 51pp; English.

The present invention describes a variant of an Erwinia-type creatinase CC (I) modified relative to a wild-type creatinase having creatinase CC activity. The variant comprises at least one amino acid substitution at a CC position of the fully defined 404 amino acid sequence given in ABR43467: these are selected from N130, M203, 1278, 11304 and F395. Creatinase has CC the EC number EC 3.5.3.3 and is also known as creatine comprising the EC Also described is a reagent (II) for determining creatine comprising the CC Erwinia-type creatinase variant. The variant is useful for determining CC creatinine and/or creatine concentration in a sample. Measuring CC creatinine and creatine are useful for diagnosing uraemia, chronic CC nephritis, acute nephritis, gigantism, tonic muscular dystrophy and some CC conductivity and/or lower Mervalues for creatine: they are much better CC suited to detection methods for creatine. The present sequence encodes a CC mutant Erwinia creatinase from the present invention

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      1080
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     1080
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              1200
```

The present invention describes a variant of an Erwinia-type creatinase (I) modified relative to a wild-type creatinase having creatinase activity. The variant comprises at least one amino acid substitution at a position of the fully defined 404 amino acid sequence given in ABR43467: these are selected from N130, M203, I278, I1304 and F395. Creatinase has the EC number EC 3.5.3.3 and is also known as creatine amidinohydrolase.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              Also described is a reagent (II) for determining creatine comprising the Erwinia-type creatinase variant. The variant is useful for determining creatinine and/or creatine concentration in a sample. Measuring creatinine and creatine are useful for diagnosing uraemia, chronic nephritis, acute nephritis, gigantism, tonic muscular dystrophy and some other related diseases. The mutant enzymes have improved stability, lower conductivity and/or lower Km-values for creatine: they are much better suited to detection methods for creatine. The present sequence encodes a mutant Erwinia creatinase from the present invention
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        Sequence 1212 BP; 240 A; 394 C; 358 G; 220 T; 0 U; 0 Other;

The present invention describes a variant of an Erwinia-type creatinase CC (I) modified relative to a wild-type creatinase having creatinase activity. The variant comprises at least one amino acid substitution at a position of the fully defined 404 amino acid sequence given in ABR43467: these are selected from N130, M203, I278, I1304 and F395. Creatinase has CC these are selected from N130, M203, I278, I1304 and F395. Creatinase has CC these creatine EC 3.5.3.3 and is also known as creatine amidinohydrolase. CC Also described is a reagent (II) for determining creatine comprising the Erwinia-type creatinase variant. The variant is useful for determining CC creatinine and/or creatine concentration in a sample. Measuring CC creatinine and/or creatine are useful for diagnosing uraemia, chronic nephritis, acute nephritis, gigantism, tonic muscular dystrophy and some CC orber related diseases. The mutant enzymes have improved stability, lower conductivity and/or lower Km-values for creatine: they are much better suited to detection methods for creatine. The present sequence encodes a cut of the conductivity and creatinase from the present invention
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            Query Match

CC The present invention describes a variant of an Erwinia-type creatinase CC (I) modified relative to a wild-type creatinase having creatinase CC activity. The variant comprises at least one amino acid substitution at a CC position of the fully defined 404 amino acid sequence given in ABR43467; CC these are selected from N130, M203, I778, I1304 and F395. Creatinase has CT these creatine EC 3.5.3.3 and is also known as creatine amidinohydrolase. CC Also described is a reagent (II) for determining creatine comprising the CC Erwinia-type creatinase variant. The variant is useful for determining CC creatinine and/or creatine concentration in a sample. Measuring CC creatinine and creatine are useful for diagnosing uraemia, chronic CC comparists, acute nephritis, gigantism, tonic muscular dystrophy and some CC conductivity and/or lower Km-values for creatine; they are much better suited to detection methods for creatine. The present sequence encodes a CC mutant Erwinia creatinase from the present invention
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      Query Match

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  The present invention describes a variant of an Erwinia-type creatinase (C) modified relative to a wild-type creatinase having creatinase activity. The variant comprises at least one amino acid substitution at a constitut. The variant comprises at least one amino acid substitution at a constitution of the fully defined 404 amino acid sequence given in ABR43467: these are selected from N130, M203, I278, I1304 and F395. Creatinase has the EC number EC 3.5.3.3 and is also known as creatine amidinohydrolase. CC Also described is a reagent (II) for determining creatine amidinohydrolase. CC Erwinia-type creatinase variant. The variant is useful for determining creatinine and/or creatine concentration in a sample. Measuring CC creatinine and creatine are useful for diagnosing uraemia, chronic combritie, acute nephritis, gigantism, tonic muscular dystrophy and some CC conductivity and/or lower Km-values for creatine: they are much better conductivity and/or lower Km-values for creatine: they are much better contextivity and/or lower Km-values for creatine: they are much better contextivity and/or lower Km-values for creatine: they are much better contextivity and/or lower Km-values for creatine: they are much better contextivity and/or lower Km-values for creatine and creatine encodes a context Erwinia creatinase from the present sequence encodes a context Erwinia creatinase from the present invention

                                                                                                                                                                                                                                                                                                                                                                 밁
                                                                                                 밁
                                                                                                                                                                                                                                                                                  S
                                                                                                                                                                                                                                                                                                                                                                                    The present invention describes a variant of an Erwinia-type creatinase (I) modified relative to a wild-type creatinase having creatinase activity. The variant comprises at least one amino acid substitution at a position of the fully defined 404 amino acid sequence given in ABR43467: these are selected from N130, M203, I278, I1304 and F395. Creatinase has the EC number EC 3.5.3.3 and is also known as creatine amidionhydrolase. Also described is a reagent (II) for determining creatine amidionhydrolase. CC Also described is a reagent (II) for determining creatine comprising the Erwinia-type creatinase variant. The variant is useful for determining creatinine and/or creatine concentration in a sample. Measuring CC creatinine and creatine are useful for diagnosing uraemia, chronic nephritis, acute nephritis, gigantism, tonic muscular dystrophy and some conductivity and/or lower fem-values for creatine: they are much better suited to detection methods for creatine. The present sequence encodes a mutant Erwinia creatinase from the present invention
                                                                                                                                                                                                                                                                                                             Query Match

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 US-08-343-428-1
Sequence 2, Application US/09025691
Patent No. 6069299
GENERAL INFORMATION:
APPLICANT: Broadway, Roxanne M.
APPLICANT: Harman, Gary E.
APPLICANT: Harman, Gary B.
TITLE OF INVENTION: FUNGUS AND INSECT CONTROL WITH
TITLE OF INVENTION: CHITINOLYTIC ENZYMES
